**I**N 1914 it was the Kaiser. In 1939 it was Hitler. In 2004 it was Saddam. Now we're at WAR again, and this time the enemy is carrier bags.

Millions of these poly-flap annoyingly in our trees and these nightmares are clutter up our kitchen drawers. discarded every day. Buried in landfill sites, they emit greenhouse gases and CFCs that

will destroy the ozone layer for hundreds of years to come, and they cut into your hands when you're carrying your shopping back to the car. Carriers are responsible for global warming, hurricanes, el Ninos and minor earth tremors in Market Rasen. and it's time they were stamped out.

We applaud Gordon Brown's

decision to consign carrier bags to the dustbin of history, along with other environmental threats such as gas-guzzling cars, budget airlines and lightbulbs that you can actually fucking see by. But before we can get rid of them, they must be replaced with a green alternative,

and that's where the **Viz Bag4Life** steps in. The stylish, hessian effect **Viz Bag4Life** is large enough to swallow all your supermarket shopping\*, and best of all it's so robust and hard-wearing that you can use it again and again. It really is a *Bag for Life!*
